

# DISPROPORTIONALITY

Decision Point: Reports for Child Abuse/Neglect

- Proportions of populations (i.e., by race, age, gender, etc.)
- Groups can be *under-* or *over-*represented in a decision point based on county population

# DISPARITY

Decision Point: Reports for Child Abuse/Neglect

- Measures the likelihood of group A experiencing the same outcome as group B
- Uses rates of county population

# RELATIVE RISK INDEX

Decision Points: Screening, Allegation Disposition

- Also measures the likelihood of group A experiencing the same outcome as group B
- Narrows population of focus to only those who have *the possibility* of an outcome
