

CQI COMMUNITY MEETING

**CANS Reports for Administrators and
Supervisors**

February 12, 2015

Jennifer Prior, M.Ed.
Outcomes Reporting Coordinator
Northwestern University

Child and Adolescent Needs and Strengths (CANS) Overview

- Assesses youth and families using a trauma-informed, strengths-based lens
- Child domains: trauma experiences, traumatic stress symptoms, life domain functioning, acculturation, emotional/behavioral needs, risk behaviors, child strengths, and age-relevant items
- Caregivers are assessed in the caregiver needs and strengths domain
- Scored using 0-3 scale
 - 2s and 3s typically reflect actionable needs while 0s and 1s reflect no need
 - In strengths section, 0s and 1s are usable strengths while 2s and 3s reflect strengths needing to be built

CANS Versions

- Residential and IA use CANS Comprehensive (CANS 1.0)
 - 105 Child and Caregiver Items
- CANS 2.0 used by Foster Care, Intact, SOC, Pregnant and Parenting Teens, and Outpatient Therapists
 - 139 Child and Caregiver Items
- CANS 3.0 rollout: all programs to use CANS 3.0
 - 92 Core Child and Caregiver plus 8 modules
 - Modules can be triggered by actionable level on a core item, age, or program type

How is the CANS Data used at Case, Program and System levels?

Program Level and System Level:

- Look at **trends and change over time**
- Provides support for **policy decisions**
- Common language and **collaboration tool**

Case Level (Family and Youth):

- Offers the **whole picture** through a Family-Centered, Trauma-Informed, Strength-Based lens
- Looks at **changes over the life of a case** for both youth and families
- Provides support for **case decisions**

Types of Reports

Northwestern provides 3 main types of reports, on aggregate and case-level:

- CANS Score Profiles
- CANS Change Reports
- CANS Compliance Reports

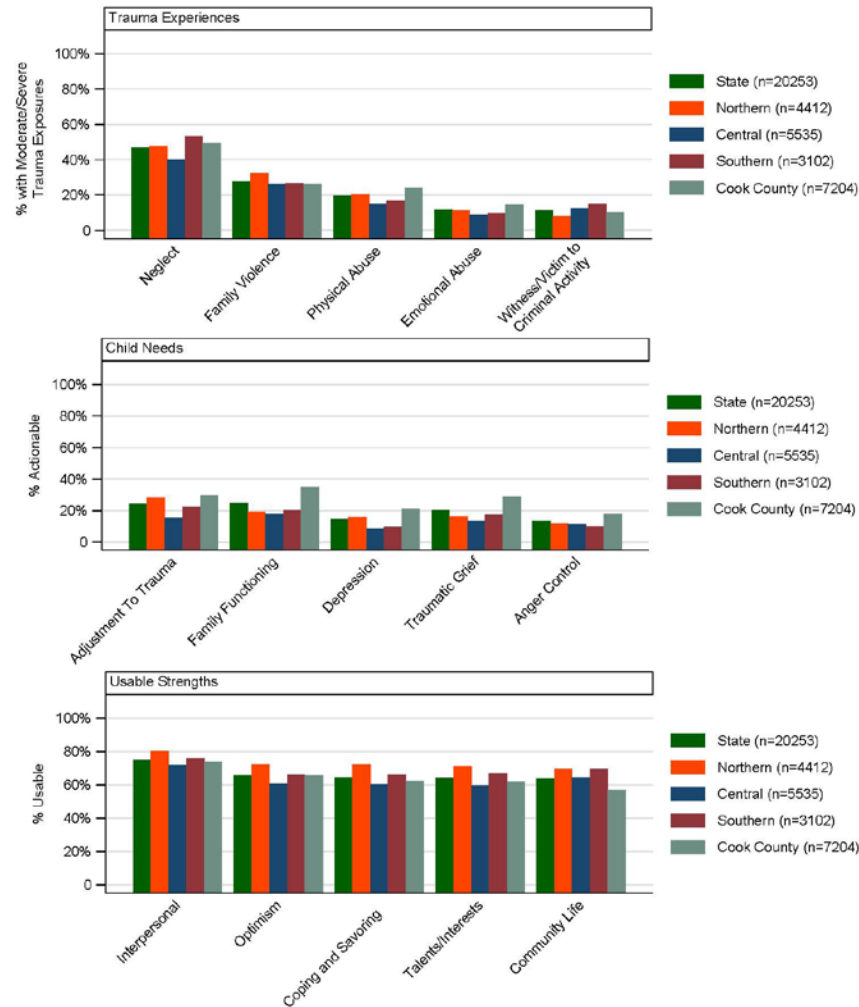

Reports for Administrators

- Reports are currently produced on a regular and ad hoc basis for DCFS administrators
- Show data on the program level and system/statewide level

CANS Score Profiles for Administrators: Statewide

Statewide Top 5 Actionable: Youth CANS Items

IA or First CANS for Open CWS Cases from 7/1/13 through 6/30/14

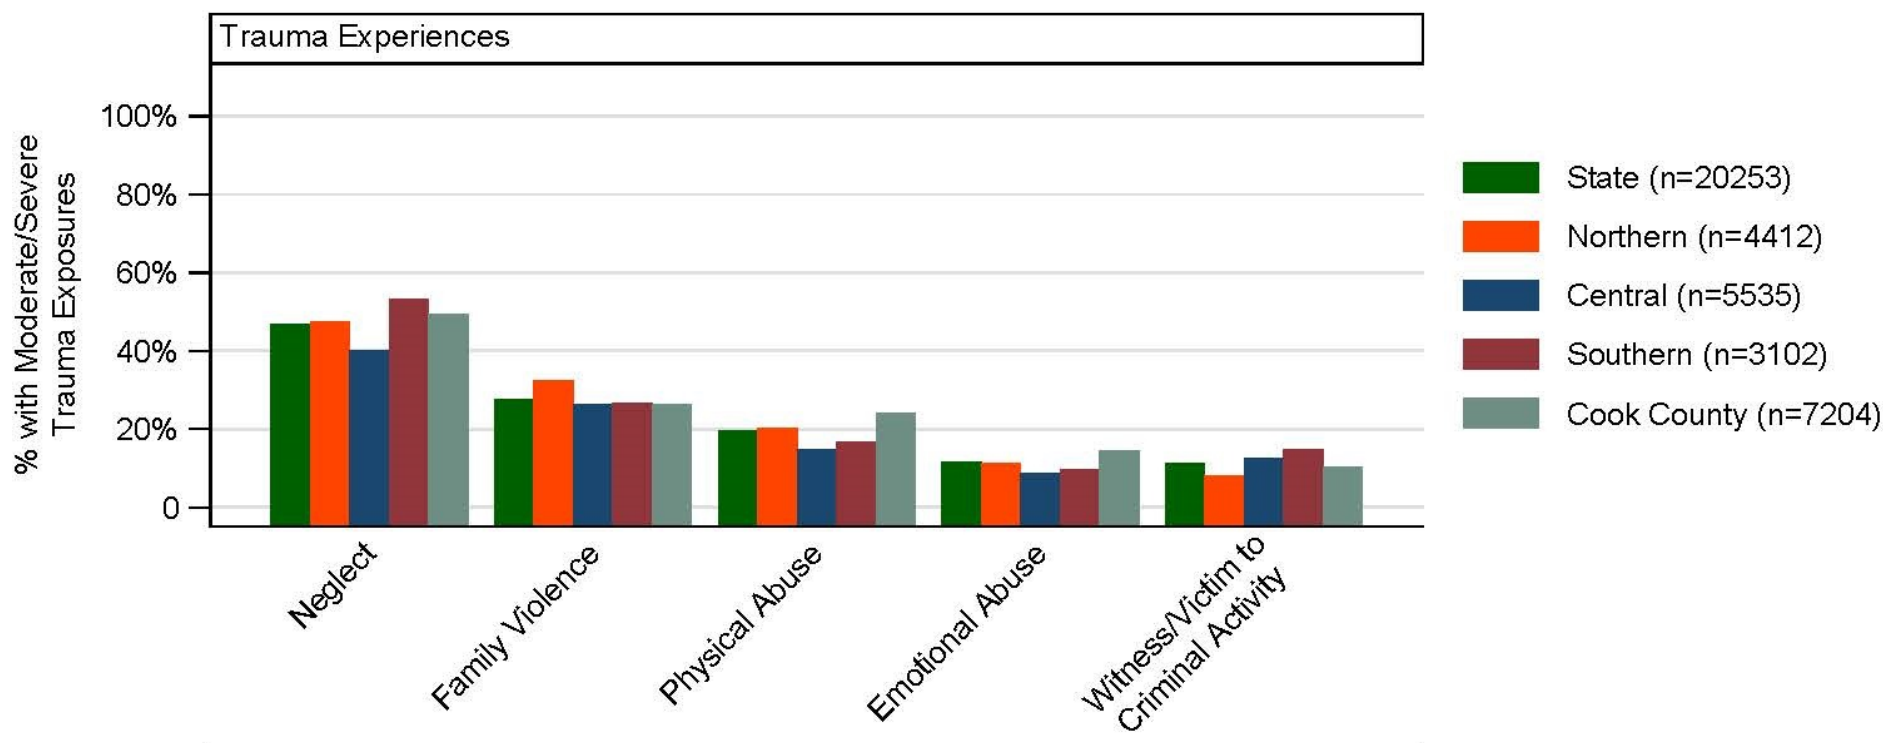

- Report includes the IA CANS or the first CANS submitted on all CWS cases open between 7/1/13 and 6/30/14.
- Bars indicate the proportion of youth in that sample (state and region) that have an actionable need or a usable strength. Higher bars indicated a greater proportion of youth with that actionable need or usable strength.
- Report includes the 5 most prevalent trauma experiences, needs, and strengths present for youth in foster care.
- Missing items were rescored as non-actionable for needs domains (0) or non-usable for strength domain (3). CANS with over 50% of items missing were not included.
- Report provides DCFS with vital information about current regional variations and similarities in needs and strengths for youth in foster care and their parents. This can help in evaluating service needs and resource allocation within a particular region and comparing service needs and resources between regions.

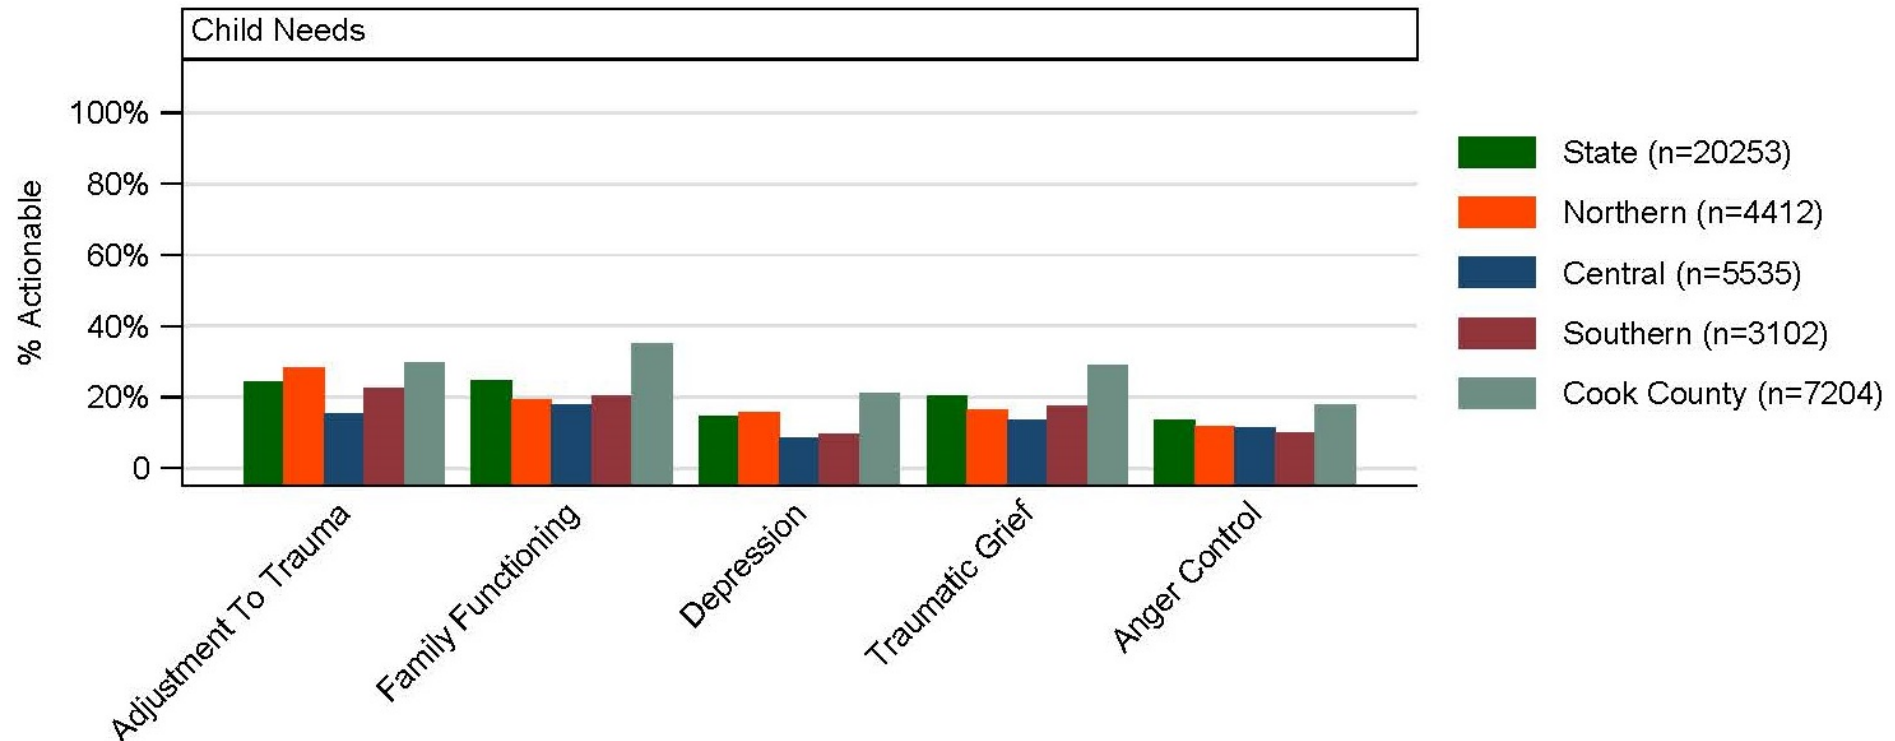

CANS Score Profiles for Administrators: Statewide

Statewide Top 5 Actionable: Youth CANS Items

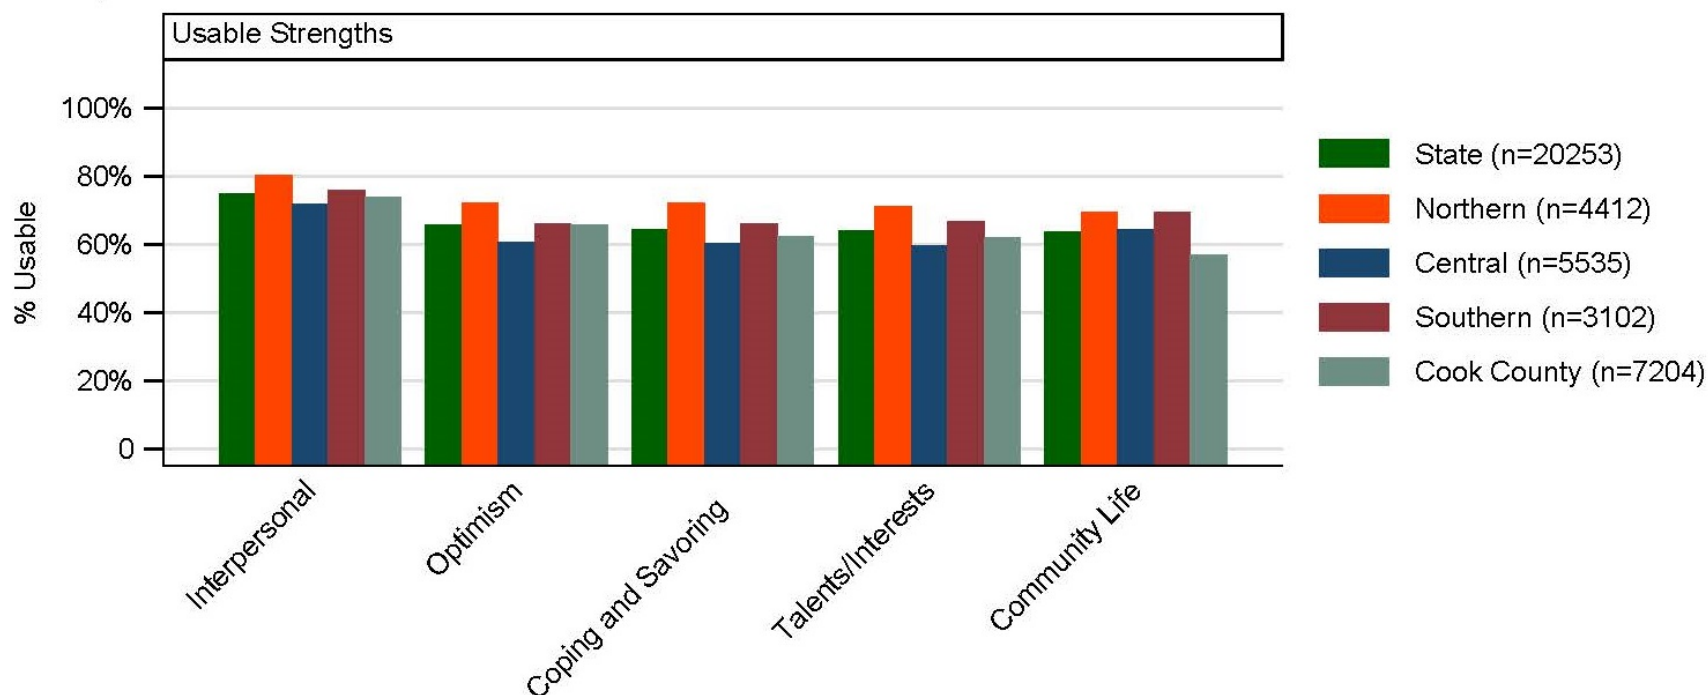

IA or First CANS for Open CWS Cases from 7/1/13 through 6/30/14

CANS Score Profiles for Administrators: Statewide

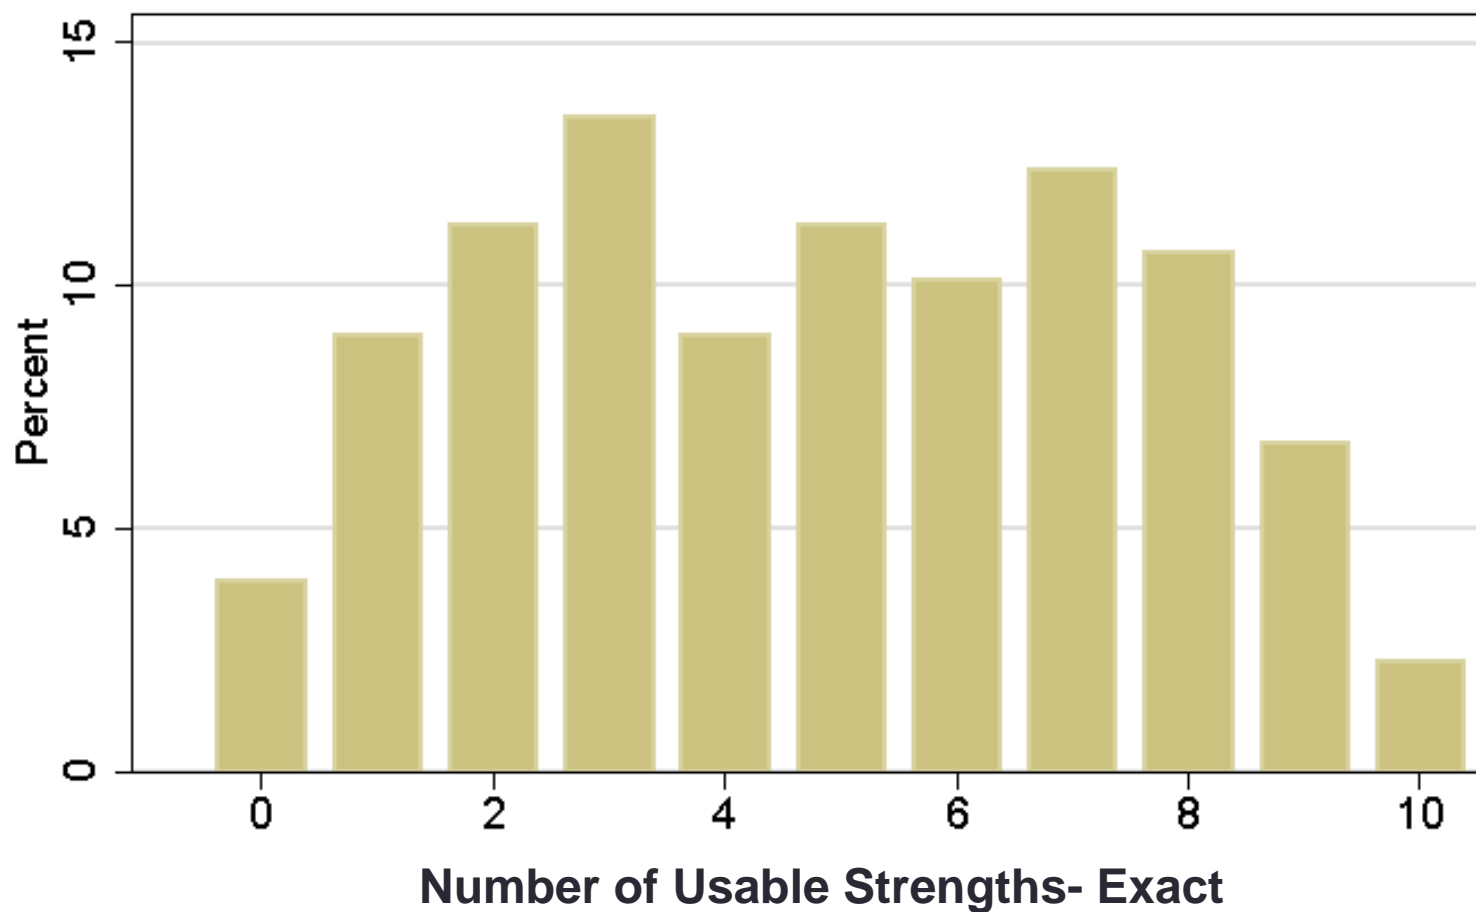

CANS Score Profiles for Administrators: Statewide

 - Piloted in CANS Demonstration Project
- Show data on the individual youth and team/RSF level

CANS Score Profiles for Supervisors: Team/RSF

Top 5 Actionable CANS Items for Selected Domains

Youth in Foster Care Settings

• Placement reports the most recent CWS CANS completed between August 1, 2012 and October 31, 2014 for cases that are currently open or that closed after May 1, 2014. Intact reports include the most recent Intact CANS completed between August 1, 2012 and October 31, 2014.

• Bars indicate the proportion of youth in that sample (team/RSF, region, and state) that have an actionable need or a usable strength. Higher bars indicate a greater proportion of youth with that actionable need or usable strength.

• Report includes the 5 most prevalent trauma experiences, needs, and strengths present for youth in foster care.

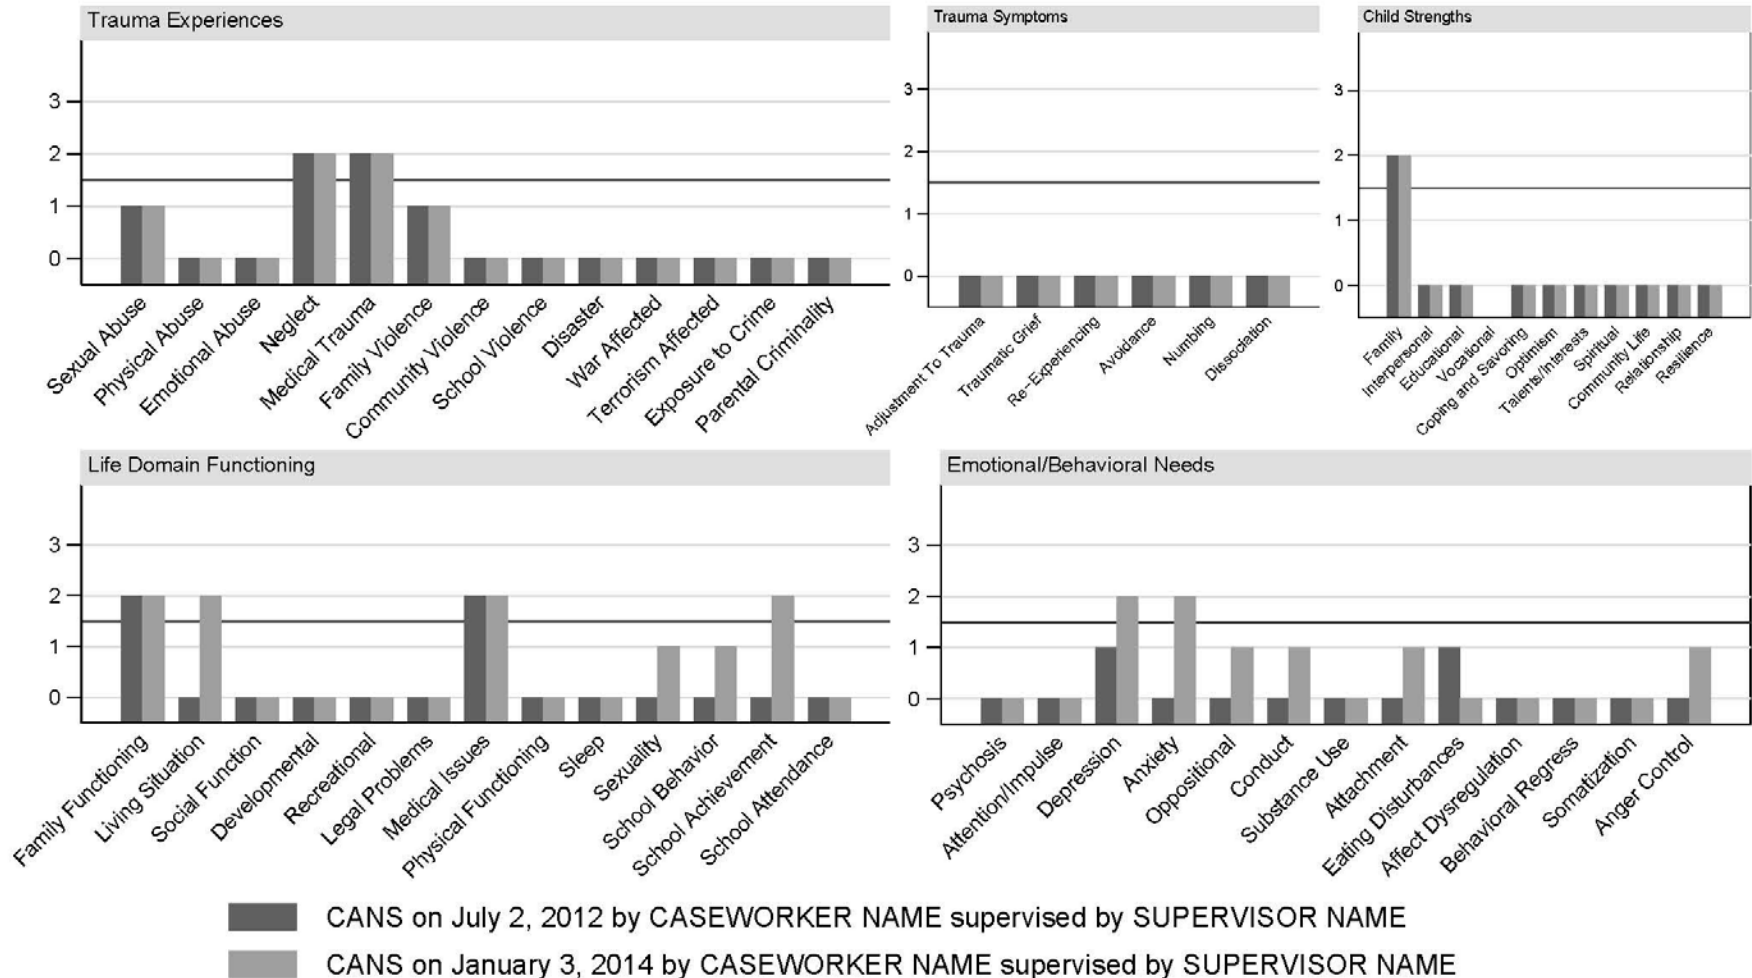

• Missing items were rescored as non-actionable for needs domains (0) or non-usable for strength domain (3). CANS with over 50% of items missing were not included.

• Report provides supervisor and agency with vital information about current variations and similarities in needs and strengths for youth being served by their team. This can help in evaluating service needs and resource allocation within a particular team and compare service needs within the agency to those of the region and state.

CANS Change Report for Supervisors: Case Level

YOUTH NAME – CYCIS ID

Individual Child Well-Being Report – Change from Initial to Most Recent CANS

- Placement reports include CWS CANS completed between August 1, 2012 and October 31, 2014 for cases that are currently open or that closed after May 1, 2014. Intact reports include Intact CANS completed between August 1, 2012 and October 31, 2014.
- CANS that are pending due to missing or incomplete information will not be reflected.
- Actionable/severe items are rated 2 or 3; Usable strengths are rated 0 or 1.
- Improvement on an item is demonstrated by a decrease in bar size from the initial to the most recent CANS.
- Report looks at improvement or worsening on CANS items associated with well-being and suggests areas where interventions are successfully addressing well-being issues.
- No movement on an actionable item indicates that an intervention should be introduced or may indicate existing interventions are not sufficiently addressing the problem.
- Absence of a bar for an item on a given CANS indicates that the item was scored as N/A (typically due to age) or left blank.
- Trauma Experience scores are based on a youth's history and are not expected to improve throughout the life of a case.

CWS CANS Submission Report by Caseworker

AGENCY NAME

SUPERVISOR NAME

Generated on December 9, 2014

| Assessor | Submitted in July 2014 | Submitted in August 2014 | Submitted in September 2014 | Submitted in October 2014 | Total from January 2012 to October 2014 |
|--------------|---------------------------|-----------------------------|--------------------------------|------------------------------|---|
| Caseworker 1 | 2 | 0 | 13 | 0 | 85 |
| Caseworker 2 | 0 | 0 | 0 | 0 | 25 |
| Caseworker 3 | 0 | 2 | 1 | 0 | 32 |
| Caseworker 4 | 1 | 0 | 0 | 0 | 31 |
| Caseworker 5 | 1 | 5 | 1 | 3 | 81 |
| Caseworker 6 | 0 | 0 | 0 | 0 | 64 |
| Caseworker 7 | 0 | 3 | 3 | 0 | 36 |
| TOTAL | 4 | 10 | 18 | 3 | 354 |

- Report includes a count of all CANS submissions for July, August, September, and October 2014. It also includes a count for all CANS submissions since January 1, 2012. (Remember, youth and foster caregiver CANS items must be completed every six months and CANS items for parents working towards reunification must be completed every 3 months.)
- Report does not include size of caseload or due dates for CANS.
- Report is intended to show supervisors the frequency with which their caseworkers are submitting CANS and allow them to follow-up on any missing or overdue CANS.
- CANS that have not been approved or are pending due to missing or incomplete information may not be reflected on report.
- If report appears inaccurate, please review CANS submissions with caseworker and then contact Northwestern University. For Intact cases, please contact Jessica Ellis (312-908-3055; jessica.ellis@northwestern.edu). For Placement cases, please contact Jennifer Prior (312-503-1578; jennifer.conat@northwestern.edu). Due to HIPAA privacy laws, do not email child-specific information.

Supervisor Report Rollout: Feedback and Lessons from CANS Demonstration Project

- Setting the stage/follow-up
